- Developed UX/UI of multi-page web application using *JavaScript, React, HTML/CSS;*
- Participated in the design and deployment to the server of a multifunctional web application for evaluating applications by experts - "Я - эксперт", using for the backend - *Django*;

Data analyst, task management and coordination. National Research University Higher School of Economics (HSE) 2019 - 2022 (3 y.)

- Participated in technical creation of the largest student competition «Я - профессионал»;
- Created the methodological rules and taught to create contests in Yandex.Contest system, also concluded technical support, using *Python, C++*
- Created and analized a report using pivot tables into *Python, Excel*;
- Participated in the admission committee at HSE Univers. Created a report using pivot tables into *Python, Excel*

Education

Yandex frontend school
2023-2023 (Student)

Lomonosov Moscow State University (MSU)
Faculty of fundamental mechanics and mathematics. Department theory of probabilities
2015-2021 (Master)

Lomonosov Moscow State University (MSU)
Faculty of fundamental mechanics and mathematics. Department theory of probabilities
2021-to present (PhD student)

Projects

– Successful, full–fledged NDA project at the Yandex Academy School of Interface Development. Technologies: Next.js, Redux, Nginx, CI/CD (gitlab), Yandex Cloud.

– www.aleksandraparin.site – the visit card.. I used React, server–side rendering on Next.js, TypeScript, as well as GraphQL for parsing data on LeetCode. (https://github.com/AparinAA/visitcard)

– https://coronacheck.vercel.app – calculator is detecting a beneficial transfer money between KoronaPay and Binance. I'm using Next.js, TypeScript, API difference site with currencies rate using axios. (https://github.com/AparinAA/coronaCheck)

– https://www.npmjs.com/~x6p – npm, lib API to work with crypto exchanges. TypeScript.

– These are used when I created BOT for inter–exchange arbitrage trading (https://github.com/AparinAA/typescript-arb)
Other projects on Github and on a personal site https://aparinaleksandr.site.

Science work

On the sojourn time distribution of a random walk at a multidimensional lattice point
Theory of Probability and Its Applications. 2021 EN version RU version
